Technical analysis

Axis Bank share prices opened on flat note and slide down before the announcement of the RBI Policy. Once the policy is out and CRR has been reduce, Axis bank share prices bouncend back quickly and break important resistance zone of 1175-1180 levels. A short-term bullish trend is evident, supported by the fact that the price is currently above the 20-period EMA (1186.80). The Supertrend indicator is showing a buy signal, with the current price of 1190. The price breaks previous resistance of 1180 with good volumes, indicating strength in this bullish move. Banking sector moved into a positive momentum today after the announcement of the RBI monetary policy, indicating as overall bullish sentiment in the market. Thus, we recommended AXISBANK 1180 Call options.
