Technical analysis

Tata Steel Ltd share prices tumbles heavily since the beginning of today's session. A continuous fall from 150 to 146.50 has been seen. The prices continuously trading below its 20 EMA level, indicating a potential of a further downside move. The prices breaks the previous support level of 148 and sustaining below it, which open the gate for the possibility of continuous bearish move. The bearish view is backed by couple of indicators, such as the prices are trading below its 20 EMA level and Supertrend indicator is showing bearish trend as red zone is active in it (as shown in image below). The prices are expect to test the next support area of 143.50 level with 149.50 as the resistance level. Thus, we recommend TATASTEEL 147.50 PUT options.
