### Technical analysis

Hero Motocorp Ltd share prices opened flat but fell down quickly and remained under pressure since the beginning of today's session. A trendline breakout can be seen which indicates a bearish reversal pattern. The prices continuously trading below its 20 EMA level, indicating a potential of a further downside move. The prices breaks the previous support level of 4550 with good volumes and expected to continue its bearish trend. The bearish view is backed by couple of indicators, such as the prices are trading below its 20 EMA level and Supertrend indicator is showing bearish trend as red zone is active in it (as shown in image below). The prices are expect to test the next support area of 4450 level with 4600 as the resistance level. Thus, we recommend HEROMOTOCO 4600 PUT options
