Technical analysis

Hindalco Industries Ltd share prices continue its bearish trend in today's session after remaining in a consolidation phase for brief period of time. Once the stock starts sliding below 626, more selling pressure is arise as 626-627 were the area where the stock was finding support. On technical front, the price is trading below its 20 EMA level, indicating a potential of a further downside move. Supertrend indicator is showing bearish trend as red zone is active in it (as shown in image below). The prices are expected to reach 610 with 630 as the resistance level. Thus, we recommend HINDALCO 620 PUT option.
