Technical analysis

Adani Ports & Sez Ltd share prices again flipped into bearish trend again after witnessing a quick rally. On technical front, the prices are trading below its 20 EMA level indicating a bearish momentum. Supertrend indicator is flipped into bearish trend as red zone is active in it (as shown in image below). The prices are expected to fall 1-1.5% more from current level as the sentiments are negative at the moment. On the higher side 1130 can act as the resistance level. Thus on the basis of above analysis, we recommend ADANI PORTS 1120 PUT option.
