Technical analysis

Maruti Suzuki India Ltd share prices flipped into bearish trend after remaining positive till half session today. The prices breaks minor support of 12000 level with good volumes and sustaining below it. On technical front, the prices are trading below its 20 EMA level indicating a bearish momentum. Supertrend indicator is showing bearish trend as red zone is active in it (as shown in image below). The prices are expected to fall 1-1.5% more from current level as the sentiments are negative at the moment. On the higher side 12150 can act as the resistance level.
