Technical analysis

NCC Ltd share prices flipped into bearish trend today after it gave a big gap down opening. On technical front, the prices are trading below its 20 EMA level indicating a bearish momentum. Supertrend indicator is showing bearish trend as red zone is active in it (as shown in image below). The prices are expected to fall 1-2% more from current level as the sentiments are negative at the moment. On the higher side 215 can act as the resistance level. Thus on the basis of above analysis, we recommend NCC 205 PUT option.
