## Our recommendation

**OPTIONS INSIGHT: BUY NIFTY 23050 PUT ABOVE 30 TARGET 90/130 STOPLOSS BELOW 5**

## Technical analysis

Nifty 50 Index prices failed to show any recovery from its minor support level of 23040. It is now break that support level and trading below it. On technical front, the price of Index is trading below its 20 EMA level indicating a bearish momentum. Supertrend indicator is showing bearish trend as red zone is active in it (as shown in image below). The prices are expected to fall 50-100 points more as it can retest its next support level of 22900. On the higher side 23100 can act as the resistance level. Thus on the basis of above analysis, we recommend NIFTY 23050 PUT option.
